

PUBLIC NOTICE: SHELDON ROAD BRIDGE REPLACEMENT PROJECT

The City of Brook Park, in cooperation with the Northeast Ohio Regional Sewer District (NEORS), the Cuyahoga County Department of Public Works (CCDPW), and the City of Middleburg Heights, is planning to replace the Sheldon Road Bridge over Abram Creek within the cities of Brook Park and Middleburg Heights. The purpose of the project is to address the deteriorating condition of the existing bridge and to improve the safety and reliability for motorists, pedestrians, and emergency services.

The proposed work includes complete bridge replacement, approach roadway reconstruction, and restoration of disturbed areas. Construction is anticipated to begin in Fall 2026 and will require temporary closure of Sheldon Road with a signed detour. Local access to residences, nearby parks, and businesses will be maintained throughout the project.

Project funding is being provided by the NEORS, CCDPW, the City of Brook Park and City of Middleburg Heights.

Environmental studies are currently underway to identify and minimize impacts to streams, wetlands, and other natural resources. The project will comply with all applicable federal, state, and local environmental regulations, including those of the U.S. Army Corps of Engineers and the Ohio Environmental Protection Agency.

Public comments or questions regarding the project may be submitted by January 9, 2026 to:

Brian Beyer
Director of Public Service
City of Brook Park
