

Ohio law requires that anyone digging must contact Ohio811 by dialing 811 or (800)362-2764, at least two working days but no more than 10 days prior to any digging, ditching and drilling, leveling or plowing activity. Representatives of Dominion Energy will then come to the location and identify nearby underground natural gas pipelines in the work area with highly visible yellow paint and/or yellow flag markers, FREE of charge. We encourage you to keep this information in mind when doing home projects like home additions and decks.

While rare, natural gas line leaks can be extremely dangerous with the potential hazards of fire or explosions. Everyone should know the signs of a natural gas leak:

- **SMELL** - To help you SMELL a leak from a natural gas line or appliance, a familiar odor similar to sulfur or rotten eggs is added to natural gas.
- **SEE** - Near a gas leak, you might SEE blowing dirt, bubbling water or an unusual area of dead vegetation.
- **HEAR** - A leaking pipeline might make a hissing sound you can HEAR.
